

Spectralink Solutions for Lync

Integrate directly with Microsoft® Lync™ and add specialized vertical mobility to your Microsoft UC Solution

BENEFITS

- **Tested and Qualified.** The Spectralink DECT and Wi-Fi solutions have been tested by Microsoft and qualified for Microsoft® Lync™
- **Direct interoperability.** Eliminate the need for a gateway, reduce complexity and reduce costs
- **Streamlined administration.** Increase flexibility and streamline administration by enabling your IT-department to centrally administer, modify and control the entire solution
- **Vertical mobility.** Add specialized vertical mobility to improve productivity, communication and satisfaction within verticals such as healthcare, retail, manufacturing and many other specialized working environments
- **Customized solution.** Mix specialized wireless handsets to meet the individual need of each employee
- **Increased ROI.** Reduce administration costs, reduce downtime and increase efficiency and productivity

Spectralink offers the only enterprise wireless mobility solutions qualified for Microsoft® Lync™. Customers who add Spectralink DECT or Wi-Fi to their Lync installations benefit from increased workplace mobility, improved staff efficiency, and a high ROI.

Integrate Directly with Lync

Spectralink offers unique wireless telephony solutions that interoperate with Microsoft Lync without the use of a gateway. This direct integration simplifies deployment and administration, reduces hardware and support costs and further accelerates your ROI.

Benefit from faster deployment, reduced complexity, and greater system control, as your IT-department can centrally administer, modify, and control the entire solution.

Get Specialized

With Spectralink you can combine Microsoft Lync with purpose-built wireless devices customized for verticals such as healthcare, manufacturing, retail and many other specialized working environments.

Deliver the power of a Lync phone to your mobile users with Spectralink wireless advantages:

- Excellent voice quality
- Enterprise-grade durability and security
- Integration with business processes and applications
