

Spectralink DECT Technical Certification

Includes Online Modules and 2 Day Live Training

Day 1 & 2: Spectralink 70-Series DECT Installation and Maintenance Certification

The Spectralink 7000 DECT Certification is intended to provide individuals interested in becoming subject matter experts with Spectralink 7000 DECT voice products the opportunity to learn everything they will need to know about the product. This course will cover all technologies and topics from the Spectralink 7000 DECT Installation & Maintenance and Spectralink 7000 DECT Advanced course into one class. Attendees will have the opportunity to experience everything they will need to know about how the Spectralink 7000 DECT product works in order to install, support, service and maintain it.

Online training consists of pre-recorded content delivered via a web browser to students prior to attending the in-class portion of the training. Attendees will be required to complete all online content prior to the in-class training. Failure to do so will result in attendees being unable to take the exam for certification.

Course will be two days and is limited to 10 attendees. Course requires a minimum attendance of 5 persons.

Pre-requisites

Students are highly recommended to have a valid CCNA certification prior to attending this course.

Online Course Outline

Must be completed online at <http://spectralink.litmos.com/online-courses> prior to start of the live training
